ABOUT ME

I am a committed and proactive IT student at ISCTE with a strong interest in technology, problem-solving, and software development. Over the past five years, I have worked on several projects independently and collaboratively with colleagues, which has helped me develop strong technical and interpersonal skills. I enjoy learning new technologies, tackling complex problems, and contributing effectively in team environments. I am eager to continue expanding my knowledge in computer science, take on new challenges, and apply my skills to practical, real-world contexts.
